Recovered parameterization under a missing dark-state channel
A
B
C
dark-truth dimer controls
independent transport fits
joint transport fit
J_{12} (eV)
k_{12} (time^{-1})
γ_ϕ (time^{-1})
waiting time t_2
waiting time t_2
waiting time t_2
All fits use the same order-3 Duhamel transport expansion and physical bounds. Independent fits expose time-dependent apparent parameters; the joint fit uses one global endpoint.
