Complex residual structure for joint fits to trap-generated spectra
(C is the generating model; its residual is at numerical precision)
A: baseline dimer | $t_2 = 0.2$
A: baseline dimer | $t_2 = 1$
A: baseline dimer | $t_2 = 4$
B: extra dephasing | $t_2 = 0.2$
B: extra dephasing | $t_2 = 1$
B: extra dephasing | $t_2 = 4$
C: explicit trap | $t_2 = 0.2$
C: explicit trap | $t_2 = 1$
C: explicit trap | $t_2 = 4$
